Assessment Mapping

Link exam questions to Course Outcomes (CO) and Program Outcomes (PO)

Mid-Term Examination - CS301

Database Systems • Total Marks: 60

Save Mapping

Question 1 10 marks

Define the principles of Object-Oriented Programming

Course Outcomes (CO)

- [x] CO1: Understand fundamental programming concepts
- [x] CO2: Apply OOP principles in software design
- [x] CO3: Implement data structures and algorithms
- [x] CO4: Design and query databases
- [x] CO5: Analyze algorithm efficiency

Program Outcomes (PO)

- [x] PO1: Engineering Knowledge
- [x] PO2: Problem Analysis
- [x] PO3: Design/Development of Solutions
- [x] PO4: Modern Tool Usage
- [x] PO5: Communication

Lecture 14: Neural Networks active

Backpropagation implementation doubt

Clarification on gradient descent optimization

Lecture 15: Machine Learning Algorithms • Posted by Sarah Johnson (CS001)

S

Shams

I'm having trouble understanding how the gradient descent algorithm converges to the optimal solution. Could someone explain the mathematical intuition behind the learning rate parameter and how it affects convergence?

2 hours ago

M

Pranjal

The learning rate controls how big of a step you take in the direction of steepest descent. Too large and you might overshoot; too small and training takes forever.
